It is up to you if you want - to have a clock in your widget - to have 2 links (one main, one secondary) - to have a globe - to have pics in your widget Download package: More info: A: Try this: Download package: How to install: Q: Creating XML from ConcurrentLinkedQueue I have a ConcurrentLinkedQueue - All entries are List. I'm wondering

what's the best way to use
LinkedTransferQueue in order
to parse through it and create a
xml. A: You can check this
question: How to write the
contents of a Queue to a file
Also you can use the following
code: List result = new
ArrayList(); XMLSerializer
serializer = new
XMLSerializer();
BufferedWriter outFile = new
BufferedWriter(new

FileWriter("xml_file.xml"));
for (String xml : queue) result.a
dd(serializer.write(outFile,
xml));

Advection is the motion of the water or any water based medium away from a low pressure source, such as a river. If the pressure difference is large enough, this motion will have the consequence of fluid

entering the dry area...
