System boards include the AMC development boards, the Blackbird boards, and various IBM PC workstation boards. PowerPC Power Architecture (PPC) is a reduced instruction set computer architecture that is used in a range of embedded devices and workstation products. The first implementation of PPC was released in 1997, and is

based on the PowerPC 970 family and PowerPC 970MP/970MF/970FX/970FGA/965/955 family of processors..
