This will generate the serial number. If you are using Windows, you will need to wait until the screen is loaded completely before clicking \"Generate Serial\". Then, exit the keygen and open Photoshop. You will now be prompted for the serial number that was created by the keygen. Enter this serial number and you are now activating the software. Most online resources will tell you to use the channel mixer to take advantage of the opacity of the alpha channel. That's not a bad way to control contrast if the image has a lot of alpha detail. But the Gradient tool enables artists to control the contrast of an image without making extensive use of the opacity of the color channel.
